***Reasons for Allowance***

1. Claims 12-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Pyotsia (U.S. Patent No. 6,317,701) discloses a management system of field devices in industrial processes including a local maintenance management system. The local maintenance systems are arranged to communicate with respective maintenance management systems of other plants located remotely apart, either directly or over a centralized maintenance management unit, to transmit and receive information on detected properties of managed device types, and to adjust maintenance management parameters of the field device types on the basis of the received data in a self-learning manner. Pyotsia does not teach a system for parameterization of field devices that the system is integrated into the field device itself; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

And Keys (U.S. Patent Application Publication No. 2003/0041135) discloses a data processing system for use with a process control system enables a plurality of process plants associated with different business entities to share a remotely situated data processing facility. Each of the plurality of process plants includes internet-enabled field devices, internet-enabled field device interface and internet-enabled data. Keys does not teach a system for parameterization of field devices that the system is integrated into the field device itself; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

Art Unit: 2121

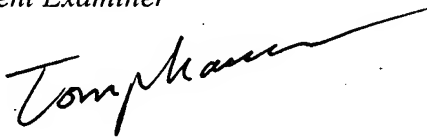

Neither of these references taken either alone or in combination discloses a system for the diagnosis and for the parameterization of devices forming sensors, actuators or controls and connected to a bus system having all the claimed features of applicant's instant invention, specifically including: parameterization of field devices, that the system is integrated into the field device. Also, there is no motivation to combine the Pyotsia reference with the Keys reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
